**Achievement** 

Data

# STAGE 1 TEACHER/PUPIL RELATIONSHIPS

'In the best practice a very positive, purposeful atmosphere pervades all aspects of learning and behaviour within and outside the classroom'

- √ Smile! Remember Bart McGettrick's inspirational words regarding the smiling eyes
  of the teacher (August 2012);
- √ Use positive affirming language: change "I can't" to "I can" and use positive body language;
- √ Personal qualities: warm, caring, approachable, trustworthy, hardworking, enthusiastic, motivational, fair, sympathetic and firm;
- √ Be able to use an extensive repertoire of appropriate responses such as firm, gentle, humorous.
- √ Listen to pupils, show interest in them as individuals and value their opinions;
- √ Praise often, 'catch them being good';
- √ Communicate clearly and positively providing support to all pupils;
- √ Be sensitive to the needs of others;
- √ Create a positive climate at the beginning of each day/lesson;
- √ Communicate appropriately high behavioural and academic expectations to all students, not just high achievers;
- √ Make sure that you give all students chances to participate in class by:
  - increasing the amount of time you wait 'wait time'
  - giving students hints and clues to help them succeed

### STAGE 2 CLASSROOMS FOR LEARNING

### Within all classrooms:

- √ there is clear subject identity in all rooms;
- √ vocabulary is displayed and forms a key component in the learning and teaching of the students; within the lesson routines there is clear evidence of use of key words;
- √ presentational displays and aids to learning e.g. AFL Aids, TSPC, Reading, Writing, Spelling, Positive Behaviour are evident in all rooms and are consistent;
- √ pupil work is displayed and rotated according to the curriculum;
- √ pupil 'ordinary work' is celebrated including Pupil of the Month, Golden Boards, Celebration Boards;
- √ seating arrangements are conducive to activity/task and needs of the students;
- √ an invitational environment is promoted which is well kept, litter and graffiti free; and
- √ students are coached to use different voices: partner voice, table voice (group voice) and classroom voice.

### **STAGE 3 POSITIVE BEHAVIOUR**

'Pupils need to feel secure and have a sense of belonging and acceptance in order to behave appropriately'

(DENI, Building Capacity 2010)

### 3.1 Ground Rules and Rewards/Sanctions

- √ Negotiate ground rules with your class and remember to use positive terms and pupil friendly language;
- √ Use a reward system for motivating and rewarding positive behaviour; and
- √ Use an agreed system of consequences (sanctions) to limit and prevent misbehaviour.

### 3.2 Clear Activity Directions

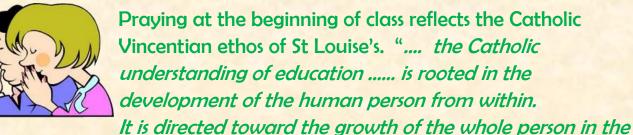

- √ Coach pupils to follow the signal for attention (countdown, arm and hand signal, deliberate silence, a small bell, timer of IAWB...)
- √ Know the hot spots in your lessons and plan accordingly;
- √ Coach the pupils in terms of which voice is appropriate during the different activities in the lesson;
- √ Ensure that activity directions are clear. Use 'PRINT' to explain Purpose, Resources, In and Out of seat, Noise level (voice) and Time (G. Moss 2002);
- √ Coach and reward good behaviour by focusing on the positive; and
- √ Use appropriate corrective feedback where necessary.

### Other helpful tips:

- √ Give attention to pupils displaying 'on-task' behaviour as opposed to highlighting inappropriate behaviour.
- √ Avoid waiting around for a student to change their behaviour immediately, they may need time and space to make a better choice.
- √ Prefacing requests with 'thank-you' has a marked effect on how the request is received.
- √ Getting down to students' eye-level is important when delivering praise or sanctions.
- √ Take time to build relationships with students. Find out about their interests or simply say 'hello'

### STAGE 4 PRAYER

context of relationship with God in Jesus Christ."

Share the Good News - the National Catholic Directory in Ireland, Pg 44

- √ Teachers can identify opportunities that arise for prayer and lead pupils to pray at the beginning, during or at the end of the lesson.
- √ It is important that teachers select prayer experiences that are relevant to young people or individuals in the class –birthdays/beginnings, achievements/ successes, class spirit, bereavement etc ......
- √ Traditional resources include Psalms, The Our Father, Glory be to the Father, Hail Mary, The Angelus, Prayer to our Guardian Angel, St Louise pray for us, St Vincent pray for us etc.
- √ Informal prayers of praise e.g. 'For what is past-thanks! For what is to come yes!'
- √ Dag Hammarskjold
- √ Contemplative prayer- silence and/or silent reflection on theme- eg birds singing outside.
- √ Creative –song, poetry, gestures, cartoon/picture from the Internet
- √ Teachers should be open to the involvement of young people prayer spontaneous
- √ Prayer experience in school can encourage young people to recognise the need for prayer in their own lives

### STAGE 5 BEGINNING THE LESSON

## **Connection Beginning the Lesson** and Deriving Learning Intentions

### **Beginning the Lesson**

- √ Stand at the door and greet pupils (where possible);
- √ Be relaxed and visualise the lesson going well before you begin;
- ✓ Provide a lesson starter that stimulates curiosity and open mindedness and prepare the brain for learning. These may be random or linked to the subject;
- √ Connect to what is already known.
- √ Encourage pupils to review what was learnt during the previous lesson;
- √ Thought showering what pupils already know about a topic can be useful.
  This can be done individually or collaboratively in groups.

### **Learning Intentions**

'A learning intention describes what pupils should know, understand or be able to do by the end of the lesson or series of lessons.'

(Learning Unlimited, 2004)

- √ Learning intentions should identify new learning and focus on thinking skills and personal capabilities and cross curricular skills.
- √ Be selective the most important (or the most difficult) new concepts or skills being taught are the most appropriate ones to display as learning intentions.
- √ Make the learning intention clear and visible throughout the lesson in language that pupils can understand - this will help the pupils to focus on the learning more effectively.
- √ Scaffold any activities towards that learning.
- √ Revisit the learning intention throughout the activity/lesson.

### STAGE 6 ACTIVATION OF LEARNING

### **Activation - Teacher Input**

### Teacher input and Pupil Engagement in New Learning

- √ The teacher uses a variety of methods and strategies to input new information including the use of the technology;
- √ The teacher presents questions relevant to the material before the extract is studied rather than after;
- √ The teacher input is of appropriate duration. As a guide it is suggested that students can listen for a maximum of ten minutes;
- √ The teacher encourages active engagement through the use of a variety of activities;
- √ The teacher checks understanding at various points through the use of a variety
  of questions to elicit responses at all levels, both orally and in written form;
- √ The teacher ensures the development of the students' listening skills; and
- √ The teacher moves around the room to ensure that pupils listen to your voice from different parts of the room.

### STAGE 7 DEMONSTRA-

### **Demonstration of Learning**

### **Success Criteria**

'In the best practice students are actively involved in developing effective success criteria before the task/activity commences; success criteria is referred to throughout the lesson/task and used for group/peer and self evaluation'

(OTSTED, Outstanding lessons 2010)

- √ Initially provide the pupils with success criteria, explicitly modelling how you generate them (temporary phase).
- √ Include vital elements visibly or pictorially throughout a lesson (or sequence of lessons) to help focus pupils' attention on them more effectively.
- √ Think about when in the lesson to introduce success criteria for best effect. This usually involves discussing them:
  - ⇒ immediately before commencing the learning activity;
  - ⇒ after teaching the new concepts and/or skills; and
  - ⇒ after briefing the children about the activity.
- √ Refer to the Success Criteria during the lesson.
- √ Provide pupils with the opportunity to develop their thinking skills and personal capabilities.
- √ By including success criteria lessen the pupils' reliance on the teacher as well
  as providing criteria that both teacher and pupils can use later in assessment.
- √ Allow pupils to construct and negotiate their own success criteria.
- √ Illustrate to the pupils what 'good' looks like through the use of exemplar materials;
- √ Know what they are aiming for and take responsibility for achieving personal targets.

### **EFFECTIVE QUESTIONING**

'Questions and questioning techniques influence pupils' achievement, attitudes and thinking skills. The level of the questions tends to obtain a similar level of answer. Achievement can improve if higher levels of questions are accompanied by wait time, redirection and probing techniques' (Muskingum.edu/questioning)

- √ Students and staff must use a variety of questions to elicit responses at all levels. Refer to the Bloom's Framework
  - Knowledge questions: describe which kind of pen you use...
  - Application questions: what does this suggest to you?
  - Analysis questions: what assumptions can be made from this?
  - Synthesis questions: can you propose an alternative to...?
  - Evaluative questions: which is more important: Daddy or chips?
- √ Use higher order questions which avoid early closure;
- √ Focus on quality rather than quantity of questions;
- ✓ Allow thinking time, encourage time for reflection before answering, give pupils time to think, this is often called 'wait time' or 'thinking time'; ("Research suggests that teachers restrict their 'wait time' to 1-3 seconds. The problem is that this is only really gives students time to recall old learning, not to construct new learning. Allowing around five seconds of wait time means that you can ask more probing questions" (Elements of Effective Practice, CCEA, 2010))
- √ Repeat the question and rephrase if necessary;
- √ Build on students' answers by prompting and accept all contributions as useful insights into how students are thinking;
- √ Enthuse, challenge and motivate pupils by using effective questioning;
- √ Ask students challenging questions which develop their thinking and communication skills;
- √ Make questioning more focused to deepen understanding of new concepts:
- √ Try a 'no hands up' question round; ("Use 'no hands up' this is a great way to extend participation to the whole class during questioning, rather than having a few students answer most of the teacher's questions" (Elements of Effective Practice, CCEA, 2010))
- √ Encourage collaborative responses to questions (e.g. think-pair-share)
- √ Prompt students to encourage extended responses;
- √ Use games/stimulus to encourage pupils questions; and
- √ Give students opportunities to ask relevant questions, explain their answers to their peers, think critically and creatively about what they have learned and to be able to explain what they have learned to their peers.

### DEMONSTRATION OF LEARNING - THINKING SKILLS AND PERSONAL CAPA-

Within the Thinking Skills and Personal Capabilities Framework it is essential that pupils learn how to learn by:

- √ engaging students in active learning as opposed to passive learning;
- √ developing a deeper understanding of topics rather than just simple recall;
- √ creating a positive disposition to learning;
- √ creating positive habits for learning; and
- √ allowing pupils to evaluate their progress.

Pupils should be given the opportunity to discover how to:

- √ ask focused questions;
- √ plan and set goals and break a task into sub-tasks;
- √ use their own and others' ideas to locate sources of information;
- √ select, classify, compare and evaluate information;
- Managing Information √ select the most appropriate method for a task;
  - √ use a range of methods for collating, recording and representing information; and √ communicate with a sense of audience and purpose.

The purpose of this strand is to engage your pupils in active learning so that they can go beyond the mere recall of factual information and the routine application of procedures.

Thinking, Problem-Solving and Decision-Making

Pupils should be given the opportunity to discover how to:

- √ sequence, order, classify, and make comparisons;
- √ make predictions, examine evidence, and distinguish fact from opinion;
- √ make links between cause and effect;
- √ justify methods, opinions and conclusions;
- √ generate possible solutions, try out alternative approaches, and evaluate outcomes;
- √ examine options and weigh up pros and cons;
- √ use different types of questions; and
- √ make connections between learning in different contexts.

"Thinking skills are tools that help pupils go beyond the mere acquisition of knowledge in order to deepen their understanding apply new ideas, generate new possibilities and make decisions as well as to plan, monitor, and evaluate progress".

The purpose of this strand is to encourage your pupils' personal responses. Curiosity, exploration, experimentation and invention are important elements of being creative and should be integrated into learning across the curriculum along with the development of knowledge and understanding.

Being Creative

Pupils should be given the opportunity to discover how to:

- √ seek out questions to explore and problems to solve;
- √ experiment with ideas and questions;
- √ make new connections between ideas/information;
- √ learn from and value other people's ideas;
- √ make ideas real by experimenting with different designs, actions, and outcomes;
- √ challenge the routine method;
- √ value the unexpected or surprising;
- √ see opportunities in mistakes and failures; and
- √ take risks for learning.

This strand enables your pupils to engage in collaborative activities and to make the most of their learning when working with others. To do this, pupils must develop the confidence and willingness to join in, have the social skills required for working in face-to-face groups, show empathy,

and develop a more general social perspective. They must also appreciate some of the aspects of group dynamics and the roles that can be assumed in groups.

Pupils should be given the opportunity to discover how to:

- √ listen actively and share opinions;
- √ develop routines of turn-taking, sharing and cooperating;
- √ give and respond to feedback;
- √ understand how actions and words affect others;
- √ adapt their behaviour/language to suit different people & situations;
- √ take personal responsibility for work with others & evaluate their own
- √ make a presentation to the group;
- √ assume a group role e.g. recorder, facilitator, reporter, resource officer etc;
- √ be fair;
- √ respect the views and opinions of others and reach agreements using
- √ negotiation and compromise; and
- √ suggest ways of improving their approach to working collaboratively.

The Self-Management strand helps your pupils become more selfdirected, so that they can manage their learning in new situations To do this, they need to become and in the longer term. knowledgeable about themselves as pupils, be more aware of their Self-Management personal strengths and weaknesses, consider how they feel about learning, and identify their interests and their limitations.

To help foster your pupils' self-management skills, you should help them discover how to:

- √ be aware of their personal strengths, limitations and interests;
- √ set personal targets and review them;
- √ manage their behaviour in a range of situations;
- √ organise and plan how to go about a task;
- √ focus, sustain attention and persist with tasks;
- √ review learning and some aspect that might be improved;
- √ learn ways to manage their own time;
- √ seek advice when necessary; and
- √ compare their own approach with others' and in different contexts.

### **DEVELOPMENT OF CROSS CURRICULAR SKILLS**

√ Opportunities should be given to develop Using Communication, Using Mathematics and Using ICT (for an overview - see Literacy and Numeracy Development Section)

### PEER AND SELF-ASSESSMENT

- √ Ensure that task and assessment criteria are accessible to everyone, differentiated where appropriate, and set clear expectation of student performance;
- √ Ensure that it is a process which is simple, engaging and non-threatening;
- √ Must be quick and easy to measure outcomes;
- √ Should allow pupils to work with exemplars and mark schemes/assessment criteria; and
- √ Should allow pupils identify improvement areas and set targets for improvement.

### The promotion of peer and self-assessment as an intrinsic part of the learning process should:

- √ actively involve students in deciding how best to assess their knowledge, understanding and skills;
- √ actively involve students in developing assessment criteria;
- √ ensure pupils understand the criteria for quality work so that they can make judgements about their own and others' work;
- √ support students to acknowledge their strengths and weaknesses and assume greater responsibility for their own learning;
- √ encourage students to ask meaningful questions about the quality of their own and others' work; and
- √ provide timely feedback to students about their learning.

### In order to assist pupils in setting targets to improve their learning, teachers should:

- √ define and display good work so that students understand what they are aiming to achieve;
- √ show exemplars of good work and expected standards;
- √ engage students in critiquing the exemplars to draw out criteria;
- √ encourage self reflection by allowing students time to respond to the feedback;
- √ clearly illustrate examples of learning targets that pupils can model;
- √ encourage students to set realistic, time limited learning targets;
- √ encourage students to record, monitor and regularly review their learning targets and progress; and
- √ work with students to discuss and review their targets

### STAGE 8 EFFECTIVE CONSOLIDATION

# **Ending the Lesson Effective Consolidation - Plenary**

### Teachers will ...

- √ review learning as appropriate within the lesson (include pauses);
- √ allocate time for a consolidation activity use a reminder tool to facilitate this process;

- √ recap on learning intentions and success criteria as appropriate (a checklist for pupils to visualise their own success through the identification of what they can now do);
- √ incorporate activities that provide opportunities to give praise;
- √ utilise AfL peer and self evaluation strategies to help children identify what new learning they have acquired or what they can now do better and how they have got there (Metacognition and bridging);
- √ encourage pupils to identify what they are good at and what learning they are still
  struggling with by utilising strategies such as traffic lights, thumbs up, etc; and
- √ respond to this feedback by allocating time for follow up activities such as "Think-Pair-Share" or "Teach Me".

### Pupils will ...

- √ understand the learning intentions, success criteria and where they fit into their learning – what they will learn/what they have learned, how they can learn/learnt, what helps them succeed and why they are learning/have learnt something;
- √ respond appropriately to teacher signals for "review" activities;
- √ settle for a period of reflection on their learning engage appropriately with key questions;
- √ participate in "active learning" consolidation activities allowing them to "try" using their new knowledge, identify pitfalls, strengths and how to improve;
- √ be more confident, have a positive outlook about new learning, have enhanced self esteem
- √ be able to identify what they can now do and link it to their outcome;
- √ be able to identify what good looks like, how to make improvements, offer constructive feedback in an appropriate way to peers;
- √ share learning strategies;
- √ teach each other giving clear pupil friendly explanations on alternative strategies for improvement;
- √ value constructive feedback and identify how to improve;
- √ try new strategies for learning;
- √ understand the value of mistakes as a learning opportunity for future success;

- √ be honest about what they are confident with;
- √ be honest about what they are less comfortable with;
- √ positively value the support provided via consolidation activities; and
- √ improve their work.

BY THE END OF THE LESSON PUPILS WILL BE AWARE OF THEIR 'STEPPED' OR OVERALL LEARNING OPPORTUNITY AND WILL RECORD IT IN THEIR PLANNER.

THE LEARNING OPPORTUNITY CAN BE SET AT THE APPROPRIATE STAGE IN THE LESSON

# STAGE 9 ASSESSMENT FOR LEARNING through Effective Pedagogy

### **DEFINING ASSESSMENT**

Assessment is a general term covering all the methods used to appraise the performance of students. This encompasses formative, diagnostic, summative and evaluative assessment:

### Assessment is:

- Derived from a Latin word 'assidere' meaning to 'sit alongside';
- An integral part of the process of learning and teaching and needs to be planned with the same care and precision;
- Making informed judgements about students' achievements and progress;
- Highlighting students' positive achievements;
- Ongoing and can take place on any occasion when students express themselves, intentionally or otherwise in relation to learning objectives;
- Based on what students know, understand and can do;
- A means of monitoring continuity and progression in students' achievements as well as evaluating their curriculum;
- A subtle art not an exact science.

### **PURPOSE OF ASSESSMENT**

 Diagnostic: To identify strengths and areas for improvement and to inform next steps;

• Formative: To use assessment information to make specific improvements in

learning. Formative assessment supports learning though identifying difficulties, providing feed back and diagnosing future

learning priorities;

• Summative: To acknowledge, record and report students' overall performance

and achievement at a point in time e.g. external examinations,

internal examinations, end of unit tests;

• Evaluative: To inform curriculum planning and to provide information for

monitoring and accountability.

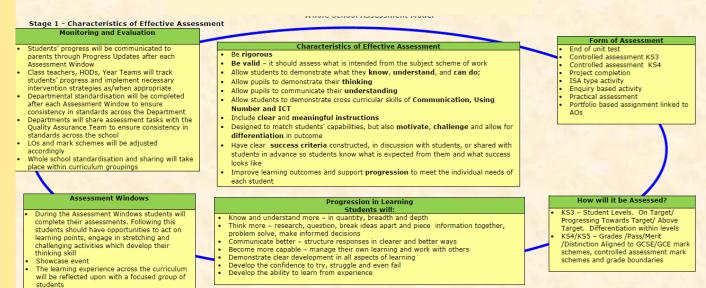

## Assessment activities in St Louise's will strive to reflect the following principles:

- · To make assessment an integral part of learning and teaching
- To use assessment to support learning
- To engage students in the learning process through the sharing of learning intentions
- To encourage and use open questioning
- To encourage peer and self-assessment
- To give constructive feedback and encourage action for improvement
- To use summative assessment formatively

# STAGE 10 Development and Assessment of Knowledge, Understanding and skills

The Whole School Assessment Model is developed around the following quality indicators and focuses on; on-going formative assessment which enables students to consolidate, to reflect on and to improve their learning. The assessment model is made up of three cycles at Key Stage 3 and two cycles at Key Stage 4 and Post 16. The learning opportunities include high quality stepped Learning Opportunities and overall Learning Opportunities which are *levelled* at Key Stage 3 and *graded* at Key Stage 4 and Post 16. Parents receive Progress Updates three times per year at Key Stage 3 and twice yearly at Key Stage 4 and Post 16.

### WHOLE SCHOOL ASSESSMENT MODEL

Within each unit all Home Learning / SLOs should take various forms and be key steps in the learning process. Home Learning / SLOs must be fully integrated in the planning, teaching, learning and assessment process.

### WHOLE SCHOOL ASSESSMENT CALENDAR 2016-2017

Home Learning every night

- 3 hours per week 1 teacher marked per week (KS4 3 hours an Post 16 5 hours) 2 hours per week 2 teacher marked per three weeks
- 1 hour per week 1 teacher marked per fortnight

### **OVERVIEW OF MARKING REQUIREMENTS**

### **Level Descriptors and Mark Schemes**

All Learning Opportunities should have an accompanying mark scheme which assesses the development of knowledge, understanding, thinking skills, and where appropriate cross-curricular skills and personal capabilities.

| Cey Question /Activity<br>ead Skill: | <b>/</b> :      | Nature of Communication<br>Personal Capabilities: |  |  |  |  |  |
|--------------------------------------|-----------------|---|--|--|--|--|--|
| Knowledge and<br>Understanding       | Thinking Skills | Communication                                     | Personal<br>Capabilities<br>(if applicable |  |  |  |  |

### WHOLE SCHOOL HOME LEARNING BOOKS / FOLDERS QUALITY

### INDICATORS

QI1: A wide variety of high quality stepped and overall learning opportunities;

Ql2: At least **one** teacher marked high quality learning opportunity in home learning books on a weekly basis (Refer Departmental Marking Policy – out line minimum number of tasks in each cycle for each year group);

QI3: High quality formative feedback through identification of strengths and LPs on all pieces of teacher marked work;

QI4: Students responding to their LPs after each piece of work through completing their 'corrections' and following up their LPs with Action Points (APs); and

QI5: Adherence to the Presentation Guidelines outlined in Home Learning Planners

### WHOLE SCHOOL CLASS WORK BOOKS / FOLDERS QUALITY INDICATORS

### Student class work books will show evidence of the following:

- Adherence to the Presentation Guidelines outlined in Home Learning Planners;
- Insertion of Topic Models;
- A wide variety of opportunities for students to engage in AFL processes linked to the application of knowledge i.e. peer and self assessment; high order questioning; engagement with thinking diagrams, summary diagrams, note making, framed lists etc;
- Students recording learning intentions and success criteria on a regular basis;
- Development of literacy skills that attend to structure, sequence, clarity, expression, vocabulary, grammar and spelling (where applicable); and
- regular use of connection and consolidation strategies.

### WHOLE SCHOOL LITERACY DEVELOPMENT CORRECTION POLICY

Sp Spelling mistake – write out three times

Gr Grammar mistake

Cap Capital Letter

NP New Paragraph required

RP Rephrase

Learning Points – LPs must be clearly signposted on Student Work this is Whole School Policy

Learning Points – LPs will then become Action Points – Students Responding to their Learning Points

## STAGE 11 Quality Student Tracking Tracking Process KS3, KS4, Post 16

On intake all Year 8 students complete a Cognitive Abilities Test which assesses a student's ability to reason with and manipulate different types of material through a series of verbal, Non-Verbal, Quantitative and Spatial Ability tasks. Together, these four tests provide teachers with a comprehensive profile of a student's reasoning abilities, and as such the core abilities related to learning. The resulting data can then be used to identify a student's strengths, areas for improvement and learning preferences, providing accurate and reliable information that is essential for personalised learning. Student progress is tracked and monitored on an ongoing basis in line with the Whole School Assessment Model.

All Learning Opportunities are traffic lighted against students' CAT target level/grade and this information is shared with parents through termly progress updates and annual parent/ teacher meeting. Where a student is performing significantly and/or consistently below her target level/grade intervention strategies are implemented in liaison with class teacher, HOD, Year Team, Intervention Coordinator and SENCO.

### Explanation of

### Descriptors

### Achievement and Progress

Above Target – Your daughter is making excellent progress. If she maintains this work rate and commitment she is likely to exceed her target level. The target may be reset to a higher level.

On Target – Your daughter is making very good progress. She should continue to achieve her target level if she maintains her work rate and comprises.

**Progressing towards target** – Your daughter, at present, has not yet achieved her target. She will continue to be supported and monitored to help her achieve her target by the end of the year.

Level 0 indicates failure to hand in Learning Opportunity

Z indicates absence for Learning Opportunity

### Attendance leads to Achievement

**Below 90%** - This level of attendance is of grave concern. Your daughter is at risk of not achieving her full potential. Immediate improvement is needed.

90-95% - This attendance is below the minimum required for success and will affect overall progress. Improvement is needed.

96-99% - This level of attendance is good. Your daughter should achieve her full potential. Please try to maintain or improve this good attendance record.

100% - This level of attendance is excellent. Your daughter is well on target to achieve her full potential. Please try and maintain this outstanding record.

All stage 3 students will complete Progress Tests in English and Progress Tests in Maths in September.

Progress Test in English identifies a student's attainment in reading and writing. Combined with data from CATS it provides a comprehensive overview of a student's reasoning ability, PTE provides teachers with additional insights into their student's learning. The test comprises of two themed reading comprehension passages (fiction and non-fiction) as well as spelling and grammar exercises. Student progress will be monitored and evaluated year on year by the class teacher, Head of English and Year Team Leader and the appropriate intervention strategies will be implemented.

Likewise, Progress Test in Maths (PTM), is a standardised assessment of student' Mathematical skills and knowledge including number, shape, data handling and algebra. This allows teachers to benchmark student's Maths knowledge, and measure their progress over time. PTM helps to identify those in need of additional help, as well as those who are particularly gifted and talent. Student progress will be monitored and evaluated year on year by the class teacher, Head of Maths and Year Team Leader and the appropriate intervention strategies will be implemented.

### PERSONALISING LEARNING

All students evaluate their performance and set learning targets through the completion of Individual Learning Plans with the support and guidance of their form tutors.

MY INDIVIDUAL St Louise's Comprehensive College, Belfast LEARNING PLAN A Specialist College Class: Name: Clubs/Societies in School Clubs/Societies outside School: NON-VERBAL VERBAL QUANTITATIVE SPATIAL STANINE SUPPORTING YOUR DAUGHTER IN HER LEARNING GENERAL LITERACY NUMERACY | will adapt my written style according to the purpose and audience, remaining form at all times.
| I will use a thesaurus to help me make imaginative and sophisticated word choices | will use a variety of AFOREST techniques in my writing to make it more interests! | will proof read and eld int yow like to ensure that the reader doesn't find many mistakes in my work; spelling most words correctly, including some difficult words which do not follow regular spelling rules:
| I will vary the way i start sentences and organise my ideas into well-structured paragraphs, ensuring that the links between sections are very close | will use punctuation accurately and for effect using my Pocket Literacy Book | will use punctuation accurately and for effect using my Pocket Literacy Book | will use punctuation accurately and for effect on the reader | will support my points with evidence and explain the effect on the reader | will read a range of fiction and/or non fiction tests nightly | will use a variety of ways to present my learning including diagrams, images, models, framed lists, notes | will take a leading role in both paired and group work, making meaningful contributions | will complete some independent learning | will take ownership of my learning through reviewing my learning points and following through with my action points | will make sure! follow the presentational guidelines i will use my maths dictionary to check the meaning of words I am unsure of I will use multiplication squares to help me with my calculations or my times table: I will use the proper equipment to complete my Home Learning I will use a protractor for measuring and drawing angles

| Will use 'Ally Maths' to revise topics I find difficult. **KEY STAGE 3** guidelines

I will make sure I am fully prepared for all my I will read a range of fiction and/or non fiction texts nightly Factor 1 Feelings Factor 8 Factor 4

### KEY STAGE 4 / POST-16

## MONITORING AND EVALUATING STUDENT PERFORMANCE AT WHOLE SCHOOL LEVEL

At whole school level student performance is monitored and tracked by class, by subject, by year group at KS4 and Post-16. In addition, at GCSE level student performance is tracked under key headline figures including:

- 5A\*-C (FSM/SEN);
- 5 A\*-C including Maths and English (FSM/SEN);
- 7A\*-C (FSM/SEN);
- 7A\*-C including Maths and English (FSM/SEN);
- 7 A\*-B (FSM/SEN); and 7A-\*-C (FSM/SEN)
- 3A\*-C A Level (FSM/SEN)
- 2A\*-E A Level (FSM/SEN)

# STAGE 12 Use of Wider Achievement Data to inform career planning and choice – PASS data

All students will complete an attitudinal survey (PASS) in order to identify and overcome barriers to learning, as well as to assist with the transition at key learning stages and career planning.

- PASS helps to inform teaching strategies and intervention programmes to raise standards of attainment and student well-being
- Helps schools tackle challenging behaviour, by identifying early those most at risk of developing behavioural problems in the future
- It is an ideal resource for addressing attendance issues
- Helps identify and support emotionally vulnerable young people and those with possible mental health issues
- It provides a helpful means to aid communication with parents, carers, external agencies and other professionals supporting young people
- PASS can provide evidence of students' perceptions of the school and their learning experience for self-evaluation and school improvement

| Factor 1 Feelings about school          | Measuring students' sense of well-being, safety and comfort in school.  |
|---|---|
| Factor 2 Perceived learning capability  | Measures students' views of how positive and successful they feel in their specific capabilities as learners.   |
| Factor 3 Self-regard as a learner       | Measures the impact of their learning on their concept of self more generally.  |
| Factor 4 Preparedness for learning      | Measures students' perceptions of their behavior and attitude in learning situations (including metacognitive skills).  |
| Factor 5<br>Attitudes to teachers       | Measures students' perceptions of their relationships with teachers.  |
| Factor 6 General work ethic             | Measures students' attitudes and responses to work in general.  |
| Factor 7 Confidence in learning         | Measures students' confidence in approaching and dealing with learning and perseverance when presented with challenging tasks, and includes associated feelings such as a 'high' anxiety element. |
| Factor 8 Attitudes to attendance        | Measures students' attitudes to attendance at school.   |
| Factor 9 Response to curriculum demands | Measures students' perceptions of the appropriateness of the level of difficulty of work they are asked to complete   |

|                             |                                     |                          | Cust                         | om 2 mean percer      | ntiles             |                           |                         |                                      |
