

Year 10!

We hope you are all well and staying safe.

We have some exciting news for you all!

As you know, it is around this time of year that Year 10 Students begin to pick their KS4 subjects. Year 10 students usually get the opportunity to talk to people from a range of different careers to help them decide which subjects they might like to choose at KS4 and to think about their future goals and careers. Unfortunately, as a result of school closure and current government guidance, the opportunity to meet professionals face to face cannot happen.

BUT! We have come up with a solution. We will not let the current crisis affect your experiences or your future at St. Louise's!

We have been working extremely hard over the past two weeks to make sure that you do not miss the opportunity to engage with professionals and reflect upon your own subject choices and future career. We have asked a variety of professionals to speak to you directly via video and to share their experiences with you. Professionals from a range of sectors were delighted to give of their time to support you. They have provided us with some excellent content to help you prepare for Year 11 and 12 and your future.

We will share the videos with you, starting this week. We want you to watch each of the videos, even if you think that career may not be for you! You might be surprised by what you learn. You will also find that a lot of the information provided applies across all subjects and careers. Along with each video, there will also be a research task that will provide you with the opportunity to explore careers further. The research tasks will allow you to think about skills and qualities as well as qualifications and entry requirements for further study. The research tasks will also encourage you to reflect and will help you to develop the research and investigation skills needed to succeed across all of your KS4 subjects.

Good luck!

The Careers Team
